

STEM forGIRLS

GET INVOLVED

SCHOOL CHAPTERS

Starting a school chapter is as easy as 1, 2, 3! Log on to our website and Learning Lab to create your chapter and educator account, and invite your students to join you for online STEM learning and career exploration. As a chapter, schools receive STEM resources, hands-on activities, and opportunities for STEM mail out kits to engage girls and gender diverse youth throughout the school year with the confidence building experiences, career information, and community connections needed for successful futures in STEM. Each chapter size varies based upon the capacity of the teacher champions and the students involved. Reach out to our career development coordinators to discuss what a chapter at your school could look like!

WORKSITE TOURS AND CONFERENCES

When available through our sponsors and partner organizations, a selection of students are invited to tour a worksite or attend a professional industry conference, where they get a deeper appreciation for STEM-careers and a direct connection to our role models.

SCHOOL VISITS

Working with the schools across the province, girls and gender-diverse youth in grades 7 through 12 can participate in STEMforGIRLS sessions with our career development coordinators.

Sessions include introductions to STEM skills, career development activities, hands-on STEM activities, and presentations by real-world role-models.

STEM forGIRLS Learning Lab

Introducing the STEMforGIRLS Learning Lab!

With five modules and over 30 subjects to explore, the Learning Lab is your next adventure for discovering STEM careers.

Create an account as an Educator and invite your students to start exploring opportunities in STEM and learn together.

Gain access to STEM resources, our Women in STEM Role Models, order kits and more!

STEM forGIRLS

Is a career in Science, Skilled Trades,
Technology, Engineering, and Math
(STEM) right for you?
